

# Delivery site worksheet

Use this worksheet to collect site details before requesting delivery. Measurements and photos support a review; they do not confirm that a truck can access or unload at your site.

Delivery ZIP / city:

---

Container size / type / quantity:

---

## 1 MAP THE ACCESS ROUTE

STREET

B: clear approach

A: entrance width

C: container  
placement area

D: door  
space

Top view - not to scale. Truck position and unloading method vary.

A Narrowest entrance / gate width (include units):

---

B Straight approach length and width; describe any turns:

---

C / D Placement area, door direction and space in front of doors:

---

Also note slopes, soft ground, drainage, overhead lines, branches and structures along the entire route. Do not approach utilities to measure them; flag uncertainty for the delivery team.

# Photos & delivery review

## 2 COLLECT THESE VIEWS

- ☐ Street approach and entrance, showing nearby obstructions.
- ☐ Gate / narrowest point, with your recorded width.
- ☐ Full approach, including turns, slopes and surface changes.
- ☐ Placement area, showing the intended door direction.
- ☐ Overhead obstacles from a safe ground-level viewpoint.

Avoid capturing people, vehicle plates or unrelated private details. Ask the team how to share site photos after you contact them.

**Ground surface / recent rain / drainage / known site constraints:**

---

**Overhead obstacles or clearances that need review:**

---

## 3 CONFIRM WITH THE TEAM BEFORE BOOKING

- ☐ Truck / unloading method and required working space.
- ☐ Ground suitability, placement plan and door orientation.
- ☐ Access permissions and any local approvals needed for this use.
- ☐ Availability, delivered quote, schedule and on-site contact.

Report any change to access, weather conditions or the placement area before dispatch. Do not treat this worksheet as engineering, utility-clearance or permit approval.

### NEXT STEP

**Request a delivered quote with your ZIP and container size.**
